

CAR / TRUCK > CAR / TRUCK - CTEK BATTERY CHARGERS > CTEK LINEA AUTO E AUTOCARRO

**CTEK MXS 5.0 POLAR**Code: **MAA02XXXX0067**

CTEK POLAR is a unique charger, with modern and advanced technology and designed specifically for the coldest environments. In fact, it is designed for vehicles that require optimal battery care in the winter such as snowmobiles, ATVs, jeeps and cars. CTEK POLAR provides a function with modified voltage for optimal charging at extremely low temperatures. This function is available for both small batteries (snowmobiles and ATVs) and normal sized (jeeps and cars). Another exclusive feature is the availability of the reconditioning function (which restores stratified and very discharged batteries) both for small and normal sized batteries. CTEK POLAR works satisfactorily even in normal climates, but is ideal for charging at temperatures between -30 ° C and + 50 ° C.
