

CAR / TRUCK > CAR / TRUCK - CTEK BATTERY CHARGERS > CTEK ACCESSORIES CAR AND TRUCK

**BATTERY TESTER - 56-924**Code: **MAA02XXXX0071**

It controls with high precision the conditions of any type of 12 V lead-acid battery, be they WET, MF, AGM, Gel, or Ca / Ca. Easy to use, it provides instant results of immediate understanding. It has a voltage range of 8 to 15 V and can test batteries from 200 to 1200 EN. Simply connect the clamps to the battery and follow the instructions on the display, step by step. The easy-to-read display provides clear information on the condition of the battery and indicates any intervention required. It does not require you to disconnect the battery from the vehicle, its patented technology works in complete safety for the user and for the vehicle's electronics. Proof of polarity reversal and spark, the analyzer does not apply loads to the battery.
