**MAXIGRIP**Code: **MAN02XXX00001**

MaxiGrip® is a patented nail mainly for construction vehicles operating on all types of terrain, as well as for footwear. The MaxiGrip® nail has a hexagonal shape and is made of hardened galvanized material, with a special hard metal insert that is extremely resistant. Assembly is easy (see image below) and is carried out quickly using the appropriate tool and a normal screwdriver. Removal is equally simple. The MaxiGrip® nail offers optimal grip on slippery winter surfaces, so much so that it no longer requires the use of two sets of tires or snow chains.
