MaxiTPMS TS608

Code: **MOF07XXXA0024**

The TS608 is equipped with a 7" touchscreen with resolution 1024x600 to ensure the best possible use of the device. The MaxiVCI Mini, included in the kit, allows the tablet to connect to vehicles and print data wirelessly. The function of automatic scanning of the VIN allows to automatically identify and quickly make, model and year of the vehicle. Powered by the processor Cortex-A9 quad-core, its stability of the system and the speed of operation have been improved to perform any function without loss of time. Thanks to multiple functionality and ease of use, the TS608 brings the TPMS service to a new level.
