**SMONTAGOMME S26 T**Code: **ASM02XSXX0024**

S26 is a universal tyre changer, which allows the assembly and disassembly of wheels from trucks, buses and tractors. Work on rims to channel or circle, with inner tube or tubeless. Its operation is electro-hydraulic and all the controls are inserted in a practical mobile column of controls that allows the user to position it in the most appropriate way. The self-centering hydraulic spindle with two-way rotating motor, guarantees an excellent and safe locking of the wheels from 14" to 26". A complete range of accessories allows you to solve difficult operational problems.
